

PRACTICE PREVENTIVE CARE FOR YOUR PET AND FOR YOUR WALLET

Annual check up exams are Important

Some vaccines are administered every three years now, however the annual examination is where you catch things before they become serious and expensive problems

Practice good dental care

Pets get cavities and periodontal disease just as humans do. Regular brushing and dental care is about more than just healthy teeth. Rotting teeth and gums are breeding grounds for harmful bacteria that can end up in the bloodstream and can shorten a pet's life by damaging the heart, liver and kidneys.

Nutrition & Exercise

Keep your pet on a healthy balanced pet food, and weight should be monitored regularly. A regular exercise routine helps both physical and mental health of your pet. Your pet will be much less likely to be obese and less likely to have behavioral issues.

Pet Proof your house

Please refer to the enclosed inserts for lists of foods, medications and household items that can be extremely harmful to your pet.

Practice good parasite control

It is important to check a fecal sample at each visit to the hospital. Intestinal parasites can be harmful to your pet and to your family. Checking blood work each year is important to monitor your pet for heartworm disease.
